

2020 – 2021 SCHOOL YEAR

PUBLIC NOTIFICATION OF ASBESTOS MANAGEMENT PLAN

Asbestos Management Plan Notification

Dear Parents, Students and Staff:

Federal law requires all schools to inspect their buildings for asbestos-containing materials and to develop Asbestos Management Plans for those materials found. Our school has completed this Asbestos Management Plan.

This Asbestos Management Plan is available for review by appointment, during regular operating hours. If you wish to see the report, please contact the school office for an appointment. All appointment requests will be honored within five (5) working days of receipt. Also, a copy of the Asbestos Management Plan can be made available, upon written request, for the cost of reproduction.

Our school maintenance and custodial staff have received specialized asbestos training and will visually survey the asbestos-containing materials in our buildings every six (6) months. A complete re-inspection, by an EPA accredited inspector, will occur every three (3) years and copies of these inspections will be available for your review. If asbestos abatement is ever required, other than small scale short duration repairs, only fully EPA accredited asbestos contractors will be used.
